JAPANESE JOURNAL OF OPHTALMOLOGY

VOLUME 18, 1974

Contents

Selected optic neuropathies.....*Frank B. Walsh*... 1
The role of the iris vessels in aqueous humor dynamics.....*Anders Bill*... 30
Carbohydrate metabolism of the lens and age.
II. Fructose diphosphate aldolase (EC 4.1.2.13) and lactate dehydrogenase (EC 1.1.1.27) in bovine lenses.....*Otto Hockwin*... 37
Progressive cone dystrophy; four cases of unusual form.....*Norio Ohba*... 50
Adrenergic and cholinergic innervation of the human lacrimal gland.....*Shigeo Tsukahara & Teruo Tanishima*... 70
Fine structure of albino mouse choroid and retina studied by freeze-etching technique.....*Shozo Nishida*... 78
Fluorescein angiography of the choroid.....*Koichi Shimizu, Keiichi Yokochi & Tadashi Okano*... 97
Denervation supersensitivity induced by chemical sympathectomy with 6-hydroxydopamine.....*Yoshiaki Kitazawa & Takeshi Horie*...109
A case of tuberculoma involving the optic nerve and chiasm.....*Jo Imachi, Masashi Shimo-oku & Junko Hirabayashi*...119
Human Lens Albuminoid.....*Robert C. Augusteyn*...127
Effects of Prostaglandins E1 and E2 on the ciliary body of albino rabbits: and electron microscopic study.....*Tadashi Tamura*...135
Experimental uveitis due to mycoplasma pulmonis.....*Masahiro Kunishi*...150
Identification of five types of S-potential and their corresponding generating sites in the horizontal cell of the carp retina.....*Genyo Mitarai, Toshiki Asano & Yozo Miyake*...161
Electroretinogram of the living extracorporeal bovine eye and blood flow.....*Kitetsu Imaizumi, Yutaka Tazawa, Tadahiro Otsuka & Hiroo Imaizumi*...177
Light and electronmicroscopic studies of the retrocorneal hyaline network.....*Teruo Tanishima & Chikako Tatsuyama*...187
Keratophakia .....*José I. Barraquer*...199
Cataract surgery in children .....*José I. Barraquer*...213
Preparation of ultrathin frozen sections of the retina.

Part 1. The photoreceptor stained with phosphotungstic acid.....*Naoya Koda & Katsuyoshi Mizuno*...226
Distribution of lysosomal enzymes in the bovine eye.....*Seiji Hayasaka*...233
Surgery of senile peripheral cystic retinoschisis with encircling silastic 3 mm band without evacuation of the cystic fluid.....*Aly Mortada*...240
Retinal detachment surgery for giant tear or macular hole. The oblique encircling silastic band without evacuation of subretinal fluid.....*Aly Mortada*...245
Videopupillographic perimetry and its clinical application.....*Shiro Narasaki, Kazushige Kawai, Satoru Kubota & Junji Noguchi*...253
Fibrinolytic activity in Behçet's disease.....*Seiji Sugiura & Kazuuchi Saito*...275
A nation-wide survey of Behçet's disease in Japan.
1. Epidemiological survey.....*Shun-ichi Yamamoto, Hiroyuki Toyokawa, Junko Matsubara, Haruo Yanai, Yutaka Inaba, Kimihiro Nakae & Masaji Ono*...282
Development of optokinetic response in the human infant.....*Seikoh Wakusawa & Yuya Sato*...299
Blood cholinesterase enzyme in patients with myasthenia gravis.....*Kazuo Mukuno, Satoshi Ishikawa & Haruo Hikita*...311
The electroretinographic PIII component of the human excised retina.....*Daizo Yonemura, Kazuo Kawasaki, Nirou Shibata & Jhoji Tanabe*...322
Electron microscopic studies on retinal repair in the monkey after xenon photocoagulation. I. Cellular responses in the early stage of repair.....*Yujiro Ishikawa & Hiroshi Ikui*...334
Fine structure of non-tumorous parts of the retina with retinoblastoma.....*Fuminori Nakao, Shigekazu Uga & Hiroshi Ikui*...350
Disorder of saccadic eye movement in cerebellar degeneration.....*Tetsuma Ozawa, Makoto Naito, Toshiaki Takasu, Tateo Warabi & Yuich Yamagami*...363
Preretinal macular fibrosis: A clinical and fluorescein angiographic presentation.....*Koichi Shimizu, Keiichi Yokochi & Emiko Ohmi*...381
Reconstruction of the dissociated neuroretinal cells of chick embryos in vitro: An electron microscopic analysis.....*Yoshitaka Ohnishi*...394
Ultrastructure of capillaries in human diabetic retinopathy.....*Tsuyoshi Kimura*...403

Subject Index of Volume 18

Aqueous humor	The role of the iris vessels in aqueous humor dynamics (*Bill*)	30
Autonomic nerve	Adrenergic and cholinergic innervation of the human lacrimal gland (*Tsukahara et al.*)	70
	Denervation supersensitivity induced by chemical sympathectomy with 6-hydroxydopamine (*Kitazawa et al.*)	109
Behçet's disease	Fibrinolytic activity in Behçet's disease (*Sugiura et al.*)	275
	A nation-wide survey of Behçet's disease in Japan. 1. Epidemiological survey (*Yamamoto et al.*)	282
Cataract	Cataract surgery in children (*Barraquer*)	213
Cholinesterase	Blood cholinesterase enzyme in patients with myasthenia gravis (*Mukuno et al.*)	311
Choroid	Fine structure of albino mouse choroid and retina studied by freeze-etching technique (*Nishida*)	78
	Fluorescein angiography of the choroid (*Shimizu et al.*)	97
Cone dystrophy	Progressive cone dystrophy; four cases of unusual form (*Ohba*)	50
Cornea	Electroretinogram of the living extracorporeal bovine eye and blood flow (*Imaizumi et al.*)	177
	Keratophakia (*Barraquer*)	199
Diabetic retinopathy	Ultrastructure of capillaries in human diabetic retinopathy (*Kimura*)	403
Electronmicroscopy	Fine structure of albino mouse choroid and retina studied by freeze-etching technique (*Nishida*)	78
	Effects of Prostaglandins E1 and E2 on the ciliary body of albino rabbits: and electron microscopic study (*Tamura*)	135
	Light and electronmicroscopic studies of the retrocorneal hyaline network (*Tanishima et al.*)	187
	Preparation of ultrathin frozen sections of the retina. Part 1. The photoreceptor stained with phosphotungstic acid (*Koda et al.*)	226
	Electron microscopic studies on retinal repair in the monkey after xenon photocoagulation. I. Cellular responses in the early stage of repair (*Ishikawa et al.*)	334

	Fine structure of non-tumorous parts of the retina with retinoblastoma (*Nakao et al.*)	350
	Reconstruction of the dissociated neuroretinal cells of chick embryos in vitro: An electron microscopic analysis (*Ohnishi*)	394
	Ultrastructure of capillaries in human diabetic retinopathy (*Kimura*)	403
Electroretinogram	Progressive cone dystrophy; four cases of unusual form (*Ohba*)	50
	Electroretinogram of the living extracorporeal bovine eye and blood flow (*Imaizumi et al.*)	177
	The electroretinographic P III component of the human excised retina (*Yonemura et al.*)	322
Eye movement	Disorder of saccadic eye movement in cerebellar degeneration (*Ozawa et al.*)	363
Fluorescein angiography	Fluorescein angiography of the choroid (*Shimizu et al.*)	97
	Preretinal macular fibrosis: A clinical and fluorescein angiographic presentation (*Shimizu et al.*)	381
Iris	The role of the iris vessels in aqueous humor dynamics (*Bill*)	30
Lacrimal gland	Adrenergic and cholinergic innervation of the human lacrimal gland (*Tsukahara et al.*)	70
Lens	Carbohydrate metabolism of the lens and age. II. Fructose diphosphate aldolase (EC 4.1.2.13) and lactate dehydrogenase (EC 1.1.1.27) in bovine lenses (*Hockwin*)	37
	Human Lens Albuminoid (*Augusteyn*)	127
	Cataract surgery in children (*Barraquer*)	213
Lysosomal enzyme	Distribution of lysosomal enzymes in the bovine eye (*Hayasaka*)	233
Myasthenia	Blood cholinesterase enzyme in patients with myasthenia gravis (*Mukuno et al.*)	311
Optic disc	Selected optic neuropathies (*Walsh*)	1
	A case of tuberculoma involving the optic nerve and chiasm (*Imachi et al.*)	119
Optokinetic response	Development of optokinetic response in the human infant (*Wakusawa et al.*)	299

Perimetry	Videopupillographic perimetry and its clinical application (*Narasaki et al.*)	253
Prostaglandin	Effects of Prostaglandins E1 and E2 on the ciliary body of albino rabbits: and electron microscopic study (*Tamura*)	135
Retina	Fine structure of albino mouse choroid and retina studied by freeze-etching technique (*Nishida*)	78
	Identification of five types of S-potential and their corresponding generating sites in the horizontal cell of the carp retina (*Mitarai et al.*)	161
	Preparation of ultrathin frozen sections of the retina. Part 1. The photoreceptor stained with phosphotungstic acid (*Koda et al.*)	226
	Electron microscopic studies on retinal repair in the monkey after xenon photocoagulation. I. Cellular responses in the early stage of repair (*Ishikawa et al.*)	334
	Reconstruction of the dissociated neuroretinal cells of chick embryos in vitro: An electron microscopic analysis (*Ohnishi*)	394
Retinal disease	Progressive cone dystrophy; four cases of unusual form (*Ohba*)	50
	Surgery of senile peripheral cystic retinoschisis with encircling silastic 3 mm band without evacuation of the cystic fluid (*Mortada*)	240
	Retinal detachment surgery for giant tear or macular hole. The oblique encircling silastic band without evacuation of subretinal fluid (*Mortada*)	245
	Preretinal macular fibrosis: A clinical and fluorescein angiographic presentation (*Shimizu et al.*)	381
Retinoblastoma	Fine structure of non-tumorous parts of the retina with retinoblastoma (*Nakao et al.*)	350
S-potential	Identification of five types of S-potential and their corresponding generating sites in the horizontal cell of the carp retina (*Mitarai et al.*)	161
Uveitis	Experimental uveitis due to mycoplasma pulmonis (*Kunishi*)	150

Index of Authors to Volume 18

A ASANO Toshiki: Indentification of five types of S-potential and their corresponding generating sites in the horizontal cell of the carp retina 161

AUGUSTEYN Robert C.: Human Lens Albuminoid 127

B BARRAQUER José I.: (1) Keratophakia 199

(2) Cataract surgery in dhildren 213

BILL Anders: The role of the iris vessels in aqueous humor dynamics 30

H HAYASAKA Seiji: Distribution of lysosomal enzymes in the bovine eye 233

HIKITA Haruo: Blood cholinesterase enzyme in patients with myasthenia gravis 311

HIRABAYASHI Junko: A case of tuberculoma involving the optic nerve and chiasm 119

HOCKWIN Otto: Carbohydrate metabolism of the lens and age. II. Fructose diphosphate aldolase (EC 4.1.2.13) and lactate dehydrogenase (EC 1.1.1.27) in bovine lenses 37

HORIE Takeshi: Denervation supersensitivity induced by chemical sympathectomy with 6-hydroxdopamine 109

I IKUI Hiroshi: (1) Electron microscopic studies on retinal repair in the monkey after xenon photocoagulation. I. Cellular responses in the early stage of repair 334

(2) Fine structure of non-tumorous parts of the retina with retinoblastoma 350
